[FULL NAME]

Backend Intern Developer

[Phone Number] | [Email Address] | Ho Chi Minh City, Vietnam | [GitHub / Portfolio Link]

CAREER OBJECTIVE

Final-year Software Engineering student with **hands-on experience in backend development** using **Spring Boot and Node.js (Express)**. Experienced in **designing RESTful APIs, implementing authentication mechanisms (JWT, RBAC)**, and working with **relational databases**. Seeking a Backend Developer Fresher position to strengthen system design skills, improve performance optimization, and contribute to scalable backend systems in a collaborative engineering environment.

WORK EXPERIENCE

Viet Japan Digital — Ho Chi Minh City *Apr 2026 – Jun 2026*

Backend Developer Intern (AI-assisted development)

- Designed and implemented **7+ RESTful APIs** for booking and survey systems using Laravel.
- Developed authentication and authorization mechanisms including **JWT, HMAC verification, OTP-based login**, and role-based access control (RBAC).
- Ensured **data consistency and idempotency** in booking workflows.
- Wrote unit tests using **PHPUnit** and participated in GitLab-based code reviews and version control.
- Collaborated in an Agile team to deliver backend features and integrate APIs with frontend systems.

PERSONAL PROJECTS

Showroom – Garage Management System *Jan 2026 – Apr 2026*

Role: Backend | Business Analyst | Frontend (Team size: 4)

Description: Web-based system allowing customers to book vehicle viewing and repair appointments online, while enabling administrators to manage garage operations and track real-time maintenance status.

Technologies: Express.js, MySQL, React.js, Material UI, Redis, Docker | **Source:** [Repository link available upon request]

- Analyzed business requirements and designed system workflows as a Business Analyst.
- Designed and developed RESTful APIs for the Admin Management module, including customer management and booking operations.
- Implemented authentication (Login/Sign-up), designed database schema, and handled CRUD operations using MySQL.
- Collaborated with frontend developers to ensure seamless API integration.

Badminton Court Booking System (BcB) *Apr 2025 – Oct 2025*

Role: Backend | Business Analyst | Frontend (Team size: 2)

Description: Web-based badminton court booking system that supports real-time reservations, multi-role management (User, Manager, Admin), voucher handling, and online payment integration.

Technologies: Spring Boot, MySQL, React.js, Material UI, Redis, Docker, SSE | **Source:** [Repository link available upon request]

- Designed and implemented RESTful APIs for court management, reservations, pricing, vouchers, and user roles.
- Developed booking workflow logic, including real-time status updates via SSE and reservation handling.
- Implemented role-based access control (RBAC) and optimized database queries using MySQL and Redis caching.
- Collaborated with frontend to integrate APIs and ensure smooth booking experience.

EDUCATION

HUTECH University *2022 – Present*

Major: Software Engineering | **GPA: 3.28 / 4.0**

• **Semi-finalist** – HUTECH IT Got Talent 2025

CERTIFICATES & LANGUAGES

• **English Certificate:** CEF B1 (HUTECH) – 2026

• Currently preparing for TOEIC Listening & Reading (Target: 650+)

• **Languages:** English (Intermediate), Vietnamese (Native)

TECHNICAL SKILLS

Programming Languages: Java, JavaScript

Backend Development: Spring Boot, Express.js, Laravel (Basics)

Frontend Development: React.js, Material UI, HTML/CSS

Databases: MySQL, SQL Server, MongoDB, Redis Caching

Concepts & Architectures: RESTful API Design, JWT Authentication, Role-Based Access Control (RBAC), Server-Sent Events (SSE), Docker

Tools: Git, GitLab, Postman, OpenCode, PHPUnit
