EXPERIENCE

FPT Software — 01/2026 – 04/2026

Java Backend Intern

- Developed and maintained backend services using **Java and Spring Boot**.
- Participated in building **microservices-based architecture** for real-world production projects.
- Implemented **RESTful APIs** and handled database integration with SQL Server.
- Worked in an **Agile/Scrum** environment, attending daily stand-ups and sprint planning.
- Collaborated with frontend developers and QA team to ensure feature completeness.
- Assisted in deployment, gaining hands-on experience with **DevOps practices and CI/CD pipelines**.

PROJECTS

Franchise Store Management System — 01/2026 – 04/2026

Java Backend Developer Intern – FPT Software | [Repository Available]

- Developed a Franchise Chain Management System for multi-store operations using microservices architecture.
- Developed RESTful APIs for store management, user roles, inventory, and operational workflows.
- Collaborated with cross-functional teams under Agile/Scrum to deliver features on schedule.

Technologies: Spring Boot, Spring Data JPA, Microservices, RESTful APIs, Kafka, CI/CD, Git

Event Handler System — University Project

[Demo & Repository Link Available upon request]

- Implemented ticket booking, interactive seat selection, order status tracking, VNPAY sandbox payment simulation, and automated refund handling.
- Designed database schema with SQL Server; contributed to modular system architecture for booking and event management.
- Deployed frontend on Vercel and backend services on Railway for end-to-end demonstration.

Technologies: Java, Spring Boot, Spring Data JPA, SQL Server, Microservices, RESTful APIs, VNPAY, Railway, Vercel, Git

Electric Motorcycle Battery Swap Management — University Project

[Repository Available upon request]

- Developed online booking and battery management functionalities for electric motorcycle swap stations.
- Designed and implemented backend following MVC architecture (DAO–DTO–Controller pattern).
- Built and integrated relational database (SQL Server), implementing CRUD operations for station and battery status tracking.

Technologies: JSP/Servlets, SQL Server, Git

EDUCATION

FPT University

Software Engineering

GPA: 3.2 / 4.0

• Good Student: Spring 2025, Summer 2025

Coursework: Data Structures & Algorithms, Database Systems

SKILLS

Languages:

Java, C#, Python, SQL, JavaScript, TypeScript

Frameworks & Tech:

Spring Boot (Java), .NET (C#), React, JSP/Servlets

Testing & Tools:

Jtest (Unit Testing), Postman, Git, CI/CD, Kafka, Docker

Core Engineering:

• RESTful API design & integration
• Relational DB design & SQL
• System Analysis (ERD, Use-Case)
• Microservices architecture
• SDLC & Agile/Scrum practices

LANGUAGES

- English: Working proficiency
- Japanese: Basic communication

SOFT SKILLS

- Strong willingness to continuously learn and adapt to new tech.
- Proactive and self-motivated in problem-solving.
- Effective team player with strong collaboration skills.
- Responsible and accountable in project delivery.
