AI Engineer

Ho Chi Minh City, Vietnam

SUMMARY

Software Engineering student with experience developing end-to-end API systems that integrate AI, LLM, and NLP models. Experienced in Python data processing with Pandas, model training and fine-tuning using PyTorch and Hugging Face, as well as API development and deployment with FastAPI and Docker. Possesses foundational knowledge of AWS cloud infrastructure and experience deploying web applications.

EDUCATION

Ton Duc Thang University – Faculty of Information Technology

- Fourth-year student
- GPA: 8.21 / 10

SKILLS

Language	Python, Java, SQL
Backend	Python, FastAPI, Django, RESTful API, Pydantic, SQLModel
AI / Machine Learning	PyTorch, Pandas, NumPy, Transformers, Hugging Face, Local LLM (Ollama), LLM API Integration, Scikit-learn, Kaggle, Colab
Database	SQL, MySQL, PostgreSQL, MongoDB
Development Tools	Git, GitHub, Docker, uv, Alembic, Nginx, Postman
Infrastructure	AWS, Docker
AI / Agent Tools	ChatGPT, Codex, Copilot, Gemini

PROJECT

End-to-end News Recommendation System

Jul 2026 – Sep 2026

AI/ML Research & Development | Team size: 2

Tech Stack: Python, Transformers, Deep Learning, NLP pre-train model, Scikit-learn, FastAPI, Docker

Source Code: [Repository link available upon request]

Architecture: [System and experiment diagrams documentation]

Responsibilities & Achievements:

- Developed an **end-to-end news recommendation pipeline** based on the MIND dataset, encompassing data preprocessing, model development, evaluation, and demonstration via FastAPI.
- Architected pipeline accepting **simple input** while combining **SBERT semantic representations** with **BERTopic topic distribution** to enhance news representations and user preference modeling.
- Developed a high-throughput demo API using **FastAPI** to serve personalized recommendations; containerized the complete service using **Docker** for reproducible deployment.
- Evaluated system using four core ranking metrics: **AUC, MRR, nDCG@5, and nDCG@10**.
- Achieved **#36 on Codabench Leaderboard** with **0.6469 AUC** and **0.3154 MRR** at submission time.

CERTIFICATES

English	Aptis ESOL – CEFR B2 Equivalent (166/200)
AWS	AWS Academy Graduate – Cloud Foundations - Training Badge
