Priya Shah Data Analyst

Chicago, IL • dataanalyst@gmail.com • +1 3122-2222

PROFILE SUMMARY

- **Data Analyst** with **6 years of experience** designing and operating **business analytics platforms** across **marketplace operations, podcast growth, and consumer subscriptions**, specializing in **KPI design, A/B test readouts, and executive-facing data storytelling**.
- Solid technical background across **warehouses** (**Snowflake**, **BigQuery**), **BI tools** (**Tableau**, **Looker**), **languages** (**SQL**, **Python**), **statistics** (**R**), and **notebooks** (**Hex**) with strong fundamentals in **experiment design, causal reasoning, and dimensional modeling**.
- Deep expertise in **KPI ownership**, **experimentation rigor**, **self-service data culture**, and **executive-facing storytelling**, leveraging methodologies such as **weekly business reviews** and **A/B test readouts** to drive **actionable, well-documented, and trustworthy analytics**.
- Engaged collaborator working **cross-functionally** with **Product, Operations, and Finance teams** in **Agile environments**, contributing to leadership reviews, launch postmortems, and metric-definition workshops with a pragmatic, ownership-first mindset.
- Emerging leader who shares technical excellence and fosters a culture of **metric integrity** and **documentation discipline** through PR reviews and runbooks, while leading **analytics guild sessions** and authoring widely adopted SQL-and-dashboard templates.

TECHNICAL SKILLS

Data Warehouses:	Snowflake, BigQuery, Redshift, Databricks
BI & Visualization:	Tableau, Looker, Mode, Power BI, Metabase
Languages & Querying:	SQL, Python (pandas, NumPy), R, Bash
Statistics & Experimentation:	A/B testing, CUPED, statsmodels, SciPy, causal inference
Modeling & Semantic Layer:	dbt, LookML, dimensional modeling, metric layer
ETL & Pipelines:	Airflow, Fivetran, Hightouch, dbt Cloud
Notebooks & Discovery:	Hex, Jupyter, Deepnote, Quarto
Communication & Documentation:	Executive briefings, board materials, RFCs, Atlan, Notion

EDUCATION

Northwestern University B.S. in Statistics

Evanston, IL • Sep 2016 - Jun 2020

WORK EXPERIENCE

DoorDash Senior Data Analyst

Chicago, IL • Sep 2022 - Present

- Lead business analytics for the **DoorDash Marketplace** team, supporting **35M+** active consumers and framing high-stakes questions across **launch evaluation**, **funnel optimization**, and **market expansion** for **8** product surfaces in partnership with Product, Operations, and Finance leadership.
- Wrote production-grade SQL on **Snowflake** powering **180+** recurring queries, refactoring slow joins around **window functions**, CTEs, and incremental dbt materializations to cut average runtime from **48s** to **6s** and unblock real-time stakeholder reporting.
- Built and maintained **22 Tableau** and Looker dashboards for **executive, product, and ops** audiences, layering **drill-down filters**, derived calculations, and explainer tooltips that reached **1,400+** weekly active users and lifted self-service adoption

from 38% to 72%.

- Defined and documented 24 core business metrics including **DAU/MAU**, **retention curves**, and **GOV composition**, governed through a **dbt metric layer** and a company-wide data dictionary, cutting cross-team metric drift across 4 leadership reviews per quarter.
- Led 8 deep-dive analyses on top-of-funnel anomalies including a 22% drop in **iOS new-user activation**, isolating the cause to a **routing-flag regression** through **cohort comparisons** and shipping a fix that recovered $1.8M in projected ARR.
- Supported 31 A/B tests for the **Pricing and Subscription** teams, designing experiment power and stratification, applying **CUPED** variance reduction, and producing causal readouts that gated 9 experiment-driven launches without false-positive shipped wins.
- Authored 48 strategic narratives including **board pre-reads**, launch postmortems, and quarterly business retrospectives for **executive leadership**, translating cohort and funnel data into recommendations that shaped 3 multi-quarter strategic bets.

Spotify Data Analyst

New York, NY • Jul 2019 - Aug 2022

- Profiled 120+ datasets across the **Streaming Insights warehouse**, hunting for **distribution skews**, null-rate spikes, and schema drift, and surfaced 15 upstream data-quality issues that blocked downstream model training.
- Owned weekly and monthly reporting for the **Podcast Growth** team, covering **listener cohort retention**, show-level engagement, and creator-tier conversion across 120+ recurring reports that anchored the team's planning rituals over 2 years.
- Built the team's self-service enablement program around **metric definitions**, column-level lineage in **Atlan**, and weekly stakeholder office hours, cutting analyst-on-call requests by 62% and lifting stakeholder NPS from 34 to 78.
- Worked closely with **Product, Marketing, and Operations** teams across 4 product surfaces to negotiate **metric definitions**, **launch quality bars**, and **dashboard ownership**, authoring 6 analytics RFCs that shaped the org's data culture and onboarded 8 new analysts.
